Air France KLM Martinair Cargo welcomes two Dutch partners to its SAF programme

Air France KLM Martinair Cargo (AFKLMP) this week signed agreements with two leading Dutch freight forwarders – Best Global Logistics and Fast Forward Freight – for participation in our Sustainable Aviation Fuel (SAF) programme.

Best Global Logistics (BGL) has joined the AFKLMP SAF programme for its 2021 marine logistics shipments (ship spares), as a crucial part of their Going Green strategy.

John Burgstra, co-CEO of the GTS group and Group Director of Best Global Logistics: *“We are very excited to have AFKLMP Cargo at our side, as a leading partner who is active in operating and promoting the reduction of carbon emissions in the airfreight industry. We are prepared to assume responsibility for the future generation of airfreight. We genuinely want to empower our customers and the entire industry to make more sustainable decisions. Through innovative tailor-made solutions, ambitious programmes and reliable business practices, we strive to deliver green logistics solutions for our world. Now and in the future.”*

BGL is actively striving to reduce carbon emissions in our industry. As a global forwarder with a leading role in marine logistics, BGL in cooperation with 4PL sister company Marinetrans, wants to set an example for many others in the industry. With this in mind they recently introduced their Going Green strategy. The SAF programme is an important part of the Going Green focus and enables BGL to connect people and goods through sustainable logistics.

Renowned Dutch freight forwarder Fast Forward Freight (FFF) is committed to leading the industry in minimising the impact of its activities on the environment. This ambition is an important reason for joining and investing in AFKLMP's SAF programme. FFF monitors its impact on the environment and sets targets for continuous improvement. Moreover, Fast Forward Freight encourages the adoption of similar principles by its suppliers.

Marc Terpstra, CEO of Fast Forward Freight: *“Fast Forward Freight in its blueprint will use every opportunity to be sustainable in their day-to-day activities. In this industry every step forward makes a big difference, and it is our social responsibility.”*

Bernard Geersing, AFKLMP Cargo's Director Benelux: *"We are extremely pleased with the willingness and concrete commitment of our Dutch partners Best Global Logistics and Fast Forward Freight to shape our common ambition for a more sustainable future. Together we are trendsetters in a field that will grow in our companies and in society."*

The Air France KLM Martinair Cargo SAF programme enables stakeholders in the logistics and airfreight industry to power a percentage of their flights with SAF. Customers determine their own level of engagement and AFKLMP ensures that their entire investment is used for sourcing SAF. By participating in the programme, customers not only reduce their carbon footprint, but confirm their commitment to leading the industry towards a more sustainable future.

--- End ---

About Best Global Logistics

Best Global Logistics specializes in integrated operations of warehousing and 3PL transportation services that are complex and time-critical. BGL has a global reach through its offices in multiple locations worldwide and through an extensive network of long-term and well-qualified partners.

Our mission is to provide peace of mind to our customers through complete and reliable solutions with competitive prices, without compromising the quality of our services. Our vision is not to be the biggest but the best in the industry. We strive for continuous innovation and we take our environment and social community into account.
